

HD INTERACTIVE AIRSHOW® MOVING MAPS

SUPERIOR VIEWS, REAL-TIME FLIGHT DATA

At Collins Aerospace, we're committed to bringing you a premier flight experience from takeoff to touchdown. That's why we're pleased to offer you entirely new, multi-dimensional views of your flight.

Introducing ASXi5, the latest HD interactive version of our Airshow® Moving Maps system. ASXi5 takes the superior imaging and positioning technologies available in previous versions to the next level so you and your passengers can enjoy learning more about your journey along the way.

Engaging perspective

With ASXi5, new Landsat 8 maps offer three-dimensional, animated views of your aircraft from every angle. And refreshed, more realistic visuals allow

you to see your journey in bold, high-definition color, delivered at 1080-pixel resolution.

There are new ways to zoom in on your position throughout the flight, plus the all new Command Center displays flight information via a simulated instrument panel. Flyover alerts can signal various points of interest on your route, so you won't miss highlights along the way.

With Airshow ASXi5, you'll always know where you are and what lies ahead.

Redefining luxury and convenience

We're ready to deliver everything you need to curate the premier flight experience. Contact your authorized Collins dealer or reach out to Collins Aerospace directly to learn more.
