## 3D MOVING-MAP CAPABILITY FOR YOUR BUSINESS AIRCRAFT

Using real-time flight data and stunning 3D moving-map technology, the Collins Aerospace Airshow® 500 enables an unprecedented variety of features to create the most interactive passenger experience possible.

Built to be fully flight ready and highly customizable for passenger preferences, Airshow 500 provides popular features, like worldwide maps, language selection and broadband-enabled live news – while giving users on-aircraft control to change settings without custom loadable software.

### SELECTED FEATURES

- Worldwide map, preset with a variety of 2D and 3D views
- Airshow® Mobile application support
- 3D relative location indicator
- Global time zones
- World clocks
- Tray mount installation
- User controls
  - Aircraft type selection
  - 16:9 or 4:3 aspect ratio
  - Units of measure and time format
  - Logo and graphics selection
  - Geographic borders
  - Language selection (English, French, German, Spanish, Arabic and simplified Chinese)
  - Language display of place names in information parameters
  - “Fasten seatbelt” and “No smoking” briefings in all available languages
  - Additional customization available, including aircraft paint scheme and custom audio briefings

# THE FIRST. THE LATEST. ALL FROM COLLINS AEROSPACE.

In 1982, Airshow made its debut as the first moving-map system for an aircraft cabin. More than four decades later, Collins continues to deliver Airshow products that lead the industry in innovative capabilities, quality and reliability.

Today, Airshow 500 features the first 3D moving-map system designed and priced for business jets.

## AIRSHOW MOBILE APPLICATION

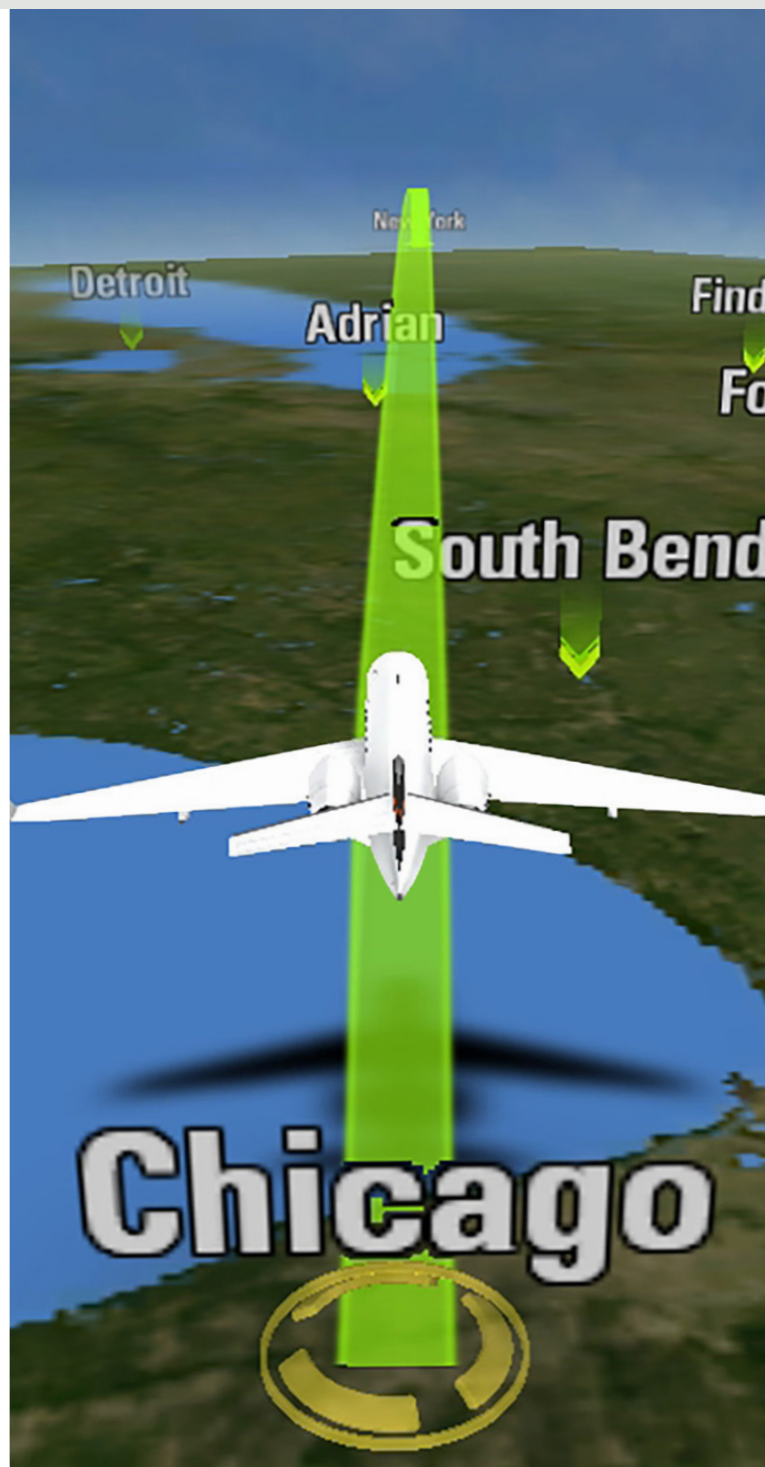

Stay informed on your journey right from your iOS® or Android™ personal devices by using the optional Airshow Mobile app. You can tap and swipe menus and views for an interactive, on-demand experience.

With the Airshow Mobile app on your device and a wireless access point on your aircraft, you're set. No more relying on preconfigured cabin broadcast displays or another traveler's preferences. You can select your own preferences for time format, units of measurement and cities using the 3D relative location indicator and world clock feature.

Further personalize your Airshow Mobile experience with custom options including matching the aircraft on your Airshow screen to the paint scheme of your real aircraft. You also can add logos and change languages, on the app so you'll feel right at home as you explore map destinations.

## SIMPLE INSTALLATION AND UPGRADE PATH

Lighter than its predecessors, Airshow 500 gives you the option to install it with a tray mount, making it a simple drop-in replacement for Airshow 200, 400, 410 and Network (Genesys).
