

A DYNAMIC TRAVEL EXPERIENCE RIGHT AT YOUR FINGERTIPS

Offering passengers a truly personalized flight

INTERACTIVE, INFORMATIVE AND ON-DEMAND

A more connected HD cabin experience

Today's business traveler is used to getting instant gratification from on-demand information at their fingertips. They expect to be more connected and informed than ever, including during flight. Offer your passengers a more interactive, informative and dynamic travel experience with Collins Airshow® Mobile 3 application.

Passengers can easily download our Airshow Mobile application to their personal iOS® and Android™ devices from the App Store or Google Play. With a tap and a swipe, they can watch real-time flight data, research points of interest and view 3D maps. The views and settings can be customized by the user to create a more personalized experience.

Airshow brings value and flexibility to your cabin. Our latest version of Airshow Mobile includes an updated graphical user interface (GUI), higher resolution images and more in-depth information about points of interest.

Our on-board Airshow system connects to the aircraft's flight management system and wireless cabin network. Airshow Mobile can be used independently or with other Collins solutions, such as Venue™ cabin management system, for the first-rate, highly connected cabin experience that your passengers expect and deserve.

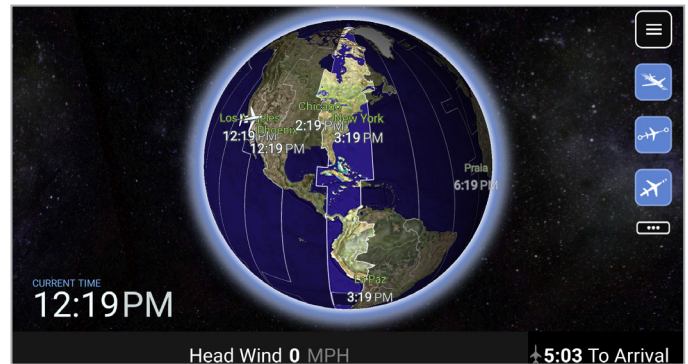

AIRSHOW MOBILE 3 FEATURES

- **Selectable map views** – Autoplay, flight preview, total route and mid-flight
- **Command center** – Multi-panel view that provides several interactive elements, including different map scenes, flight data banners and a 3D aircraft over a compass
- **3D time zone globe** – Using gestures, rotate the globe to see different time zones around the world, or pinch and zoom to get a closer look
- **World clocks** – Select up to nine cities to see the current time, population, elevation and distance from the aircraft
- **Window seat/panorama** – Experience the world beyond the cabin, as if looking through transparent walls and floor
- **Aircraft symbol** – Enjoy your aircraft icon and add a custom paint scheme for a more personal touch
- **Day and night sky views** – Align with the time of day at your present location
- **Portrait mode** – Turning your device vertically provides a quick snapshot of key information, including a flight progression bar and time to destination
