AIRSHOW® MOBILE 3 APPLICATION
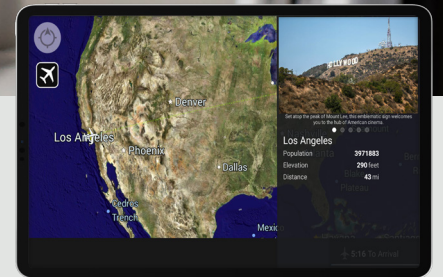

A MORE DYNAMIC TRAVEL EXPERIENCE

Interactive, informative and on-demand

Today's business traveler needs to stay more connected and informed than ever. Collins Airshow® Mobile application puts information at your passengers' fingertips – creating a more interactive, informative and dynamic travel experience.

With a tap and a swipe, passengers can receive real-time flight data, research points of interest and view 3D maps. The views and settings can be customized by the user to create a more personalized experience.

Our latest version of Airshow Mobile includes an updated graphical user interface (GUI), higher resolution images and more in-depth information about points of interest.

Airshow can be used independently or combined with other Collins solutions, such as Venue™ cabin management system, to provide a first-rate, highly connected cabin experience for your passengers.

KEY FEATURES & BENEFITS

- Real-time flight data
- Selectable map views
- High resolution maps
- 3D time zone globe
- Customizable settings
- World clocks

GETTING STARTED

Collins Airshow Mobile application is compatible with iOS® 9.2 or later and Android™ 4.2 or later on any mobile device. Download Airshow Mobile application to a device from the App Store or Google Play. Earlier versions of Airshow Mobile are supported and can be updated. Please contact your Airshow account representative for assistance.

For installation of the Collins Airshow system on your aircraft, call your Collins Aerospace dealer and find out the most effective connection method for your platform.

SYSTEM REQUIREMENTS

Airshow Mobile application is compatible with the following on-board Airshow systems that are connected the aircraft's flight management system and wireless cabin network:

- Airshow 4000 Mod B with Service Pack 5.2 or later
- Airshow on Media Center in Venue, version 4.2 or later
- Airshow on HTSE/HDAV in Venue, version 6.1 or later
- Version 10 software on the Bombardier Global Express
- Airshow 500
- Gogo ATG Platforms (ATG 1000, 2000, 4000 or 5000 with 2.8 software or its AVANCE L3, L5, SCS Elite and SCS Media with 1.2 software)
