Collins**

Building trust every day

## Cleared and connected to all your destinations

*You've invested in an exceptionally advanced aircraft. Now is your opportunity to take that flying experience further. Stay connected with your friends and family or business colleagues while in the air or on the ground. All from one trusted source of innovation in the world of global travel.*

Enjoy the advantages of one source

### CONNECTIVITY

### AVIONICS

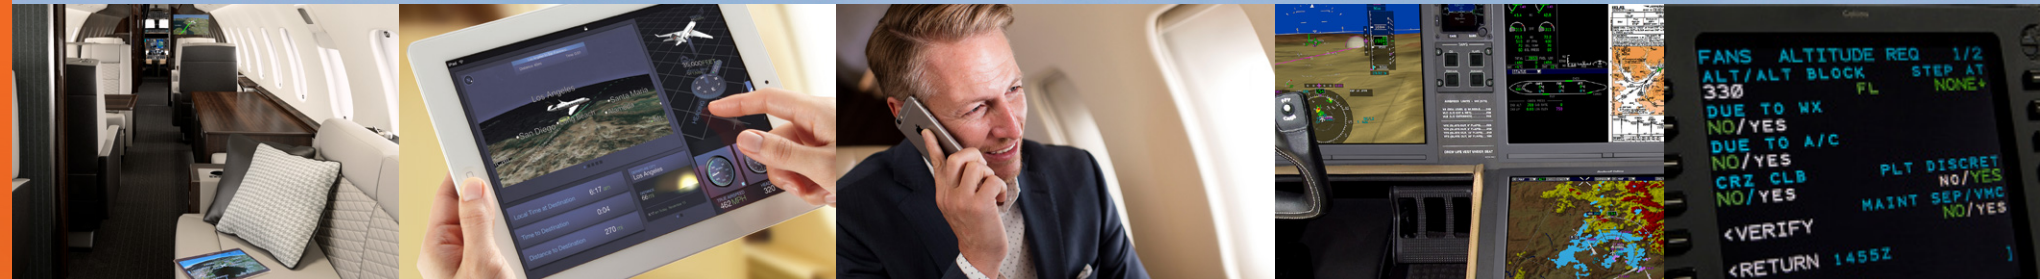

### CABIN

### SERVICES

## Stay connected, engaged and informed

*Everything you need to enhance performance across your aircraft*

A full range of connectivity options empowers passengers and crew members to be as productive in the sky as they are on the ground. And because one company delivers them all, you can depend on a seamless solution – along with unmatched expertise for all your aircraft's connectivity needs.

### Connectivity infrastructure

The hardware that makes aircraft connectivity work.

- › Radios: high-frequency (HF), Iridium®, Inmarsat SATCOM, VHF
- › Routers: Airborne Data Routers with optional two channels of Iridium
- › Antennas: Tailwind®, Ku/Ka Band

### Flight-deck connectivity services

Options that can enhance your aircraft's safety, efficiency and mandate compliance.

- › Iridium
- › Inmarsat
- › VHF and HF data link/ACARS

### Cabin connectivity services

Reliable, fast, global data delivery for passengers and aircrews.

- › Inmarsat Jet ConneX
- › Inmarsat SwiftBroadband
- › ViaSat® Mobile Broadband Service
- › Iridium voice and fax

# Flight deck options

*Equip your aircraft to fly to more places*

Options for your Global aircraft's Pro Line Fusion® integrated avionics system address upcoming equipment mandates as well as redundancy requirements that expand the world where you can fly.

To learn more about avionics baseline features, go to [www.rockwellcollins.com/global5000-6000](http://www.rockwellcollins.com/global5000-6000)

MANDATE	MANDATE	MANDATE
<b>ADS-B Out</b>	Equip now; be ready for domestic and global DO-260B mandates required by 2019.	
<b>Link 2000+</b>	Reduce the risk of flying lower assigned altitudes. Link 2000+ equipage secures your preferred access to European airspace while meeting the 2020 mandate.	
<b>Takeoff and Landing Alerts</b>	Provide your pilots with the aural and visual positional-awareness cues to safely navigate from takeoff to touchdown at unfamiliar airports – especially in low visibility.	
<b>Second data link</b>	Expedite your departure time by quickly uploading your flight plan or obtaining ATC departure clearance via text.	

## Steep approach

Gain access to those unique city center and mountainous terrain airports and avoid driving from an outlying satellite airport.

## Dual XM WX Satellite Weather®

Complement the on-board weather radar system with strategic weather. Expanding your viewpoint from 320 to 1,000 nautical miles increases pilot awareness to changing weather patterns.

## Dual data-link graphical weather

## Second Synthetic Vision System (SVS)

Incorporating SVS redundancy ensures your flight deck displays always maintain that preferred 3D perspective of the outside world.

## Third IFIS

No need to carry on a separate device or manage multiple interfaces. Built-in redundancy preserves quick access to charts, maintenance manuals and current weather overlays.

## Quick access recorder

Easily access aircraft performance data or download off-aircraft for Flight Operations Quality Assurances analysis.

## Crew force measurement

Activates data flow of installed OEM sensors to your flight data recorder.

# Dynamic ways to engage

*Tailor your experience for work or play*

Whether you want to upgrade your Cabin Electronic System (CES) to our Venue™ cabin management system or will be enjoying Venue pre-equipped on your new Global aircraft, you'll have new ways to make the most of your flight time. Optional services and products bring the familiar conveniences of your preferred lifestyle on board. Work or relax throughout your journey, just as you do at home.

## Venue cabin management system

Settle into your cabin on every flight with a rich variety of content choices. Venue delivers it with superb, future-focused design and proven reliability. Venue comes pre-equipped on new Global aircraft; we also offer a Venue upgrade path for Global aircraft with CES.

## Stage™ content service

Stream Hollywood movies and TV shows, catch up on real-time news, sports and weather\*, play games and see destination information – all on your own personal devices.

## Tailwind® TV

View any televised sporting event, news or show in real time during your flight. Take the comfort and convenience of your living room into your cabin.

## Airshow® moving maps

Explore Airshow moving maps from your personal iOS and Android™ devices with Airshow Mobile. Custom aircraft, paint schemes, logos, languages and more can make your Airshow experience one of a kind.

## Cabin connectivity

Choose from a breadth of cabin connectivity options, including Inmarsat Jet ConneX and SwiftBroadband, ViaSat and Iridium to meet your phone, fax, voice and data needs. Combine these with our Airborne Data Router, a multitude of service enhancement applications and our global support to receive an unprecedented cabin experience.

\*Requires connectivity for real-time news, sports and weather feeds

# Streamline every trip, start to finish

*World-class service and support anywhere, anytime, every time*

From the moment you decide on a destination, Rockwell Collins is there with the support that helps make any trip a pleasure to take. Our services and tools are designed to smooth every detail of every flight.

## CASP<sup>SM</sup>

Corporate Aircraft Service Program (CASP) solutions provide Global 5000 and Global 6000 operators with both CASP and CASP Elite services. These tailored solutions improve the operational availability of your aircraft at a predictable annual cost. With no pre-inspection or buy-in fees, the average customer saves 15 to 25 percent in maintenance costs.

## International trip support

The tools you need to take the worry out of worldwide travel planning. Weather, fuel services, visa and passport confirmation, TSA waivers, APIS submission, aircraft and passenger security and much more.

## FOS<sup>®</sup>

### Flight Operations System

FOS gathers everything you need in one place – your scheduling, maintenance, International trip support tools and more – with rich features and no redundant data entry. The FOS Mobile app lets you access FOS tools and services from your iOS and Android™ devices.

## Flight planning

Create and file electronic flight plans anywhere worldwide, using aircraft performance data and the latest atmospheric forecasts for the most precise fuel burns and time calculations. With our iPad® app, you'll always have up-to-date weather information and flight plans at your fingertips.
