Collins Aerospace

CALIBRATION SERVICES

Frequently asked questions:

What is your average turn-around time for equipment calibration?
The average turn-around-time for most equipment is less than 10 days.

Who are your customers?
Collins Aerospace provides service to a diverse group of customers. We provide calibration services for avionics companies, telecommunication and space technology companies, industrial and government organizations, airlines, schools and service centers. To meet your calibration and service needs, we offer both fixed-base and mobile on-site CALVAN services.

Does the Wichita Service Center provide traceability?
Yes, the Wichita Service Center provides the ability to document that the value assigned to a particular measurement is directly related to the NIST (National Institute of Standards and Technology) to the extent their services provide. This measurement is derived from nationally accepted values of physical constraints or ration-type self-calibration techniques.

Do your services include a report of calibration?
Yes, we provide a report of calibration to our customers for audit purposes. This document validates traceability and describes the received in-or-out of tolerance conditions, calibration procedure applicability, date of calibration, and the measurement standards used.

How can I learn more about Rockwell Collins Calibration Services?
Call the Wichita Service Center at +1.316.677.4828 during business hours (M-F, 7:30 AM-5:00 PM CST), or email CALVAN@rockwellcollins.com.
