

ELEVATE YOUR IN-FLIGHT ENTERTAINMENT OPTIONS

Your favorite TV programs & live events – while flying

Collins Aerospace

YOUR FAVORITE CONTENT, ALWAYS ACCESSIBLE

As the industry's first direct broadcast satellite television system for medium to large business aircraft, Tailwind® brings live TV to your cabin. The news, sporting events and entertainment programs you enjoy go with you wherever you travel in your business jet.

HOME ENTERTAINMENT, NO MATTER WHERE YOU ARE

Business flights can be long and sometimes stressful. Knowing you can access a range of satellite channels from around the world to bring your favorite entertainment content onboard helps you – and everyone you're traveling with – sit back, relax and enjoy the flight. If you like movies, our Entertainment Unlimited package includes premium content from all the major channels and streaming platforms. You may be away from home, but Tailwind brings a little bit of home into your aircraft cabin.

NEWS AND INFORMATION ON THE FLY

Do you need to track news events as they unfold in real time? Follow stock market activity while you're in the air? When traveling in the contiguous United States, you can access your favorite news programming, live sports and specialty cable networks – with both East and West Coast feeds. In other regions, such as Europe, the Middle East, India and eastern China, your viewing choices include local-language channels. Plus, you'll have the option to access premium encrypted channels and free-to-air content. A variety of programming in these regions comes to you in HD.

YOUR SOLUTION TO IN-FLIGHT TV

- Stress-relieving entertainment
- Real-time news updates
- Live sporting events
- Feels like home entertainment
- Instant access to programs

MULTI-REGION SIGNAL RECEPTION

The Tailwind system's advanced signal reception provides you with clear, global reception for a vast selection of programming across multiple regions. Multi-region content is offered in real time, so you won't miss a thing while you are in the air. Tailwind will automatically switch as you enter a new region. Choose your region based on your travel plans. You will receive continuous signal service, regardless of region transitions.

HD-READY SERVICE

Don't compromise when it comes to having instant access to the quality content you're looking for. Tailwind is the only HD-ready, multi-region, in-flight satellite television service currently offered on the market. Compared to video streaming through the internet, satellite TV is more reliable, less expensive and has fewer restrictions while traveling internationally. If you've ever been stuck buffering a streaming movie, you know that instant satellite access is the way to go.

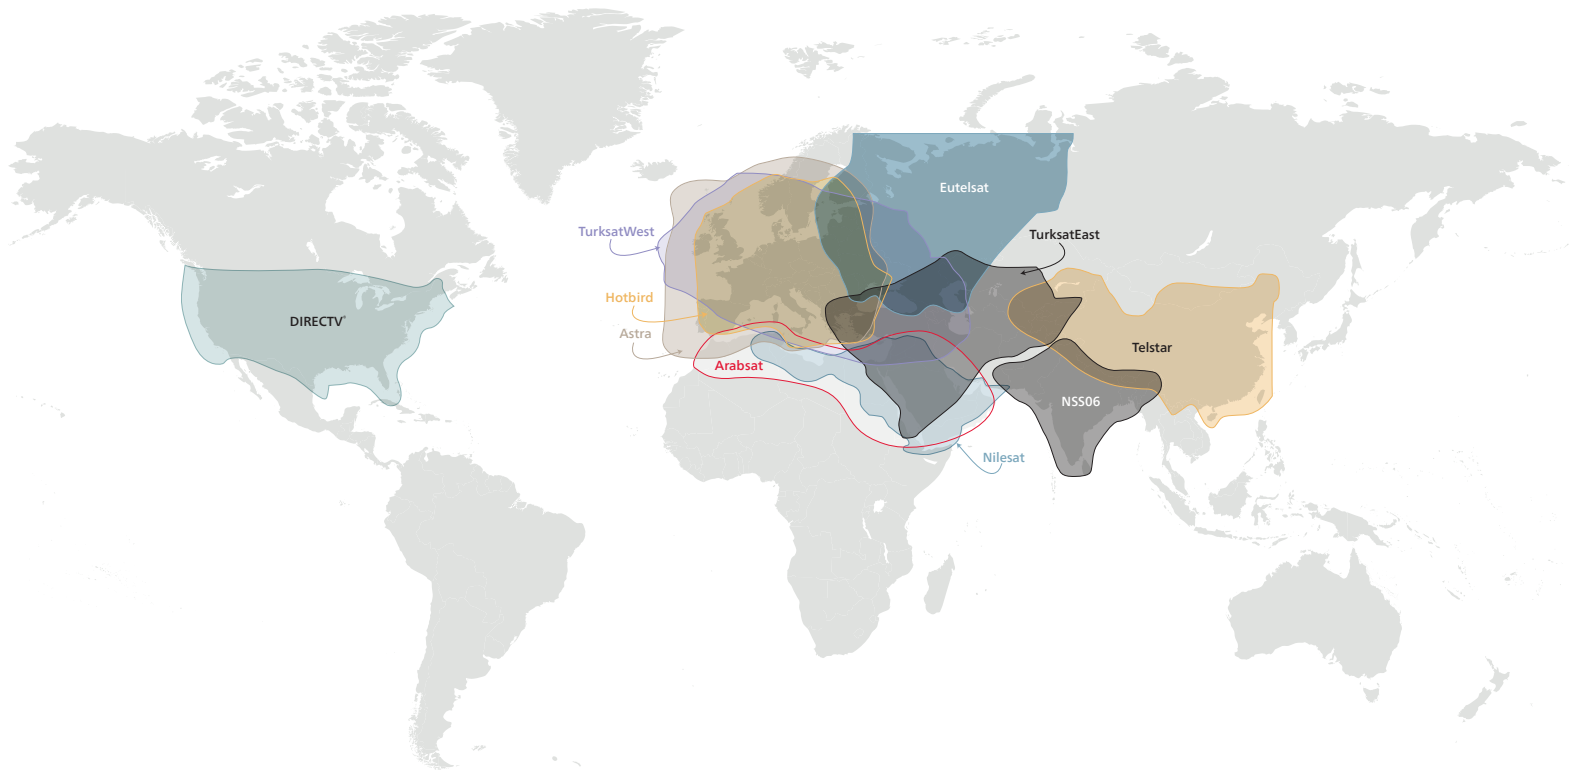

LIVE BROADCASTING IN YOUR PREFERRED REGIONS
