

# SIMPLIFYING AND PERSONALIZING THE PASSENGER EXPERIENCE

Upgrade your cabin to match your lifestyle.

# REDEFINING CABIN ENGAGEMENT EQUIPPED FOR THE FUTURE

Your cabin is an extension of you and your lifestyle. It is the most personal connection you have to your aircraft. You certainly want to step into it, seamlessly use all of your latest devices and be surrounded by high-definition clarity.

The Collins Aerospace Venue™ cabin management system (CMS) will expertly customize your cabin to fit your life,

business and personal preferences — putting all the control at your fingertips. You'll be able to enjoy the everyday comforts of home and the functionality of your extended office in the air, providing the utmost efficiency and productivity.

## COMFORT WITHOUT COMPROMISE

Whether you're traveling with VIP passengers, your entourage or with children, Venue gives them individual command over their experience. Venue integrates popular consumer technologies like voice control and wireless audio, allowing passengers to use their own devices wirelessly to interact and engage with the cabin in a truly unique way. You can even save your favorites as a preset for any phase of flight, and Venue will remember just the way you like it.

Crew members have a separate touch-screen control panel in the galley for maintenance, water levels and other operational systems, enabling them to control specific functionality conveniently and comfortably.

Collins has earned the reputation for delivering high-quality, dependable cabin solutions that enable the most successful executives to conduct business in the utmost comfort, anywhere they go. With over 1,700 high-definition cabin installs, on more than 50 different aircraft types, Collins is continuously innovating the Venue experience for passengers and installers alike to be the most capable, reliable and flexible cabin solution for the most discerning travelers.

## Venue intelligence inside

Venue's graphical user interface (GUI) was developed using consistent human factors concepts to achieve the perfect balance of modern elegance and intuitive, convenient navigation to optimize the user experience. Intelligently designed and flexible, the GUI uses pictures and icons for an attractive, simple and immediately usable interface, regardless of language spoken.

Venue combines ultra-high-definition 4K smart monitors, seamless wireless passenger control options and state-of-the-art touch-control switch technology that supports VIP or standard configurations to provide a brilliant viewing and intuitive user experience that feels like you're at home. The system's built-in computing power and agility also make it easy to incorporate future consumer technologies, making Venue more than just a display upgrade – it will be the backbone of your cabin experience for years to come.

## Integrate with supporting services

Collins customers have the power to choose from a selection of supporting services that integrate with the Venue CMS. Venue seamlessly integrates with leading environmental, lighting and entertainment streaming solutions, using customizable control points to create unique passenger experiences. Our products easily interact with numerous other cabin technologies on the market, or other Collins products, such as:

- Airshow® moving maps
- Stage™ on demand
- Tailwind® satellite TV

## The value of Venue

From design to installation, life-cycle support and upgrades, Collins provides Venue customers a high-value experience for years. Our dedicated project planning teams collaborate with you to customize the perfect cabin solution for your lifestyle, intelligent self-diagnosing software ensures the system keeps running optimally and 24/7 support helps earn Venue's reputation for unmatched reliability.
