

COMFORT AND CAPABILITIES WITH **NO COMPROMISES**

The elite cabin experience,
exquisitely refined

Venue cabin concept

UPGRADE YOUR CABIN EXPERIENCE TO **THE NEXT LEVEL**

Delivering an exceptional cabin experience to VIP and VVIP aircraft requires meticulous attention to detail. With the Venue™ cabin management system from Collins Aerospace, award-winning design details and fine craftsmanship surround you.

Venue offers the trusted, proven reliability for which Collins Aerospace is known. It is by far the most fielded system of its kind, installed on a variety of private, government and business aircraft. It delivers a wide range of features and technology that are deserving of your elite aircraft.

Our cabin management system is designed with you in mind. It can be seamlessly integrated with leading environmental,

lighting and entertainment solutions with customizable control points to satisfy the most discerning passenger. Plus, our system has a ruggedized, fiber-optic backbone that will support your current and future needs. You get all of this and more with no compromises.

With Venue you can connect to the system using your smartphone or tablet to control your lighting, shades, temperature, entertainment, and even monitor your flight path.

It all adds up to an elite cabin system that beautifully complements your luxurious cabin environment.

YOUR PRODUCTIVITY SOARS WITH ONBOARD OFFICE CAPABILITIES

Venue's data network, wireless and wired options make the cabin your airborne office. Use your laptop computer and other iOS and Android™ devices just as you would at home, for your most productive time in the air.

Stay informed in flight with the latest financial and news updates through Inmarsat Jet ConneX (JX) SATCOM integrated with Inmarsat SwiftBroadband. This global connectivity also enables videoconferencing, so you can handle business matters wherever you fly.

INFORMATION AND ENTERTAINMENT AT YOUR COMMAND

Adapted from the latest in consumer technologies, Venue offers unsurpassed content options, including interactive Airshow® moving maps and Audio and Video On Demand (AVOD) for all passengers to enjoy. As consumer technologies advance, Venue is designed to support software upgrades with ease and cost-effectiveness. And wait until you see what's playing on Venue now.

STAGE™ ON DEMAND

Familiar and inviting, Stage lets you bring your home information and entertainment with you on board, wherever you fly. Stay informed through Stage's business news, weather and sports feeds, along with destination and event information. Be entertained with our massive library of 400+ licensed Hollywood and international movies, 400+ TV shows, music collections and games.

Stage manages it all with ease – including your personal library of onboard content.

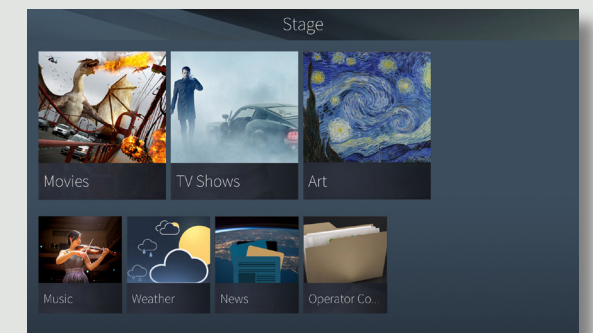

AIRSHOW® MOVING MAPS

Explore destinations around the virtual globe and follow your flight in real time with Airshow moving maps. Select from a variety of engaging flight information displays and map views.

You can enjoy all the captivating features of Airshow on your iOS or Android devices with our Airshow application. For example, the panorama feature animates your display screen with sweeping, real-time views of the world outside your aircraft – as if your cabin walls and floor were invisible.

AVOD

With Venue's AVOD solution, you can watch your own library of unencrypted movies and videos on the cabin's bulkhead monitor, at your seat or even streamed wirelessly to your DNLA-certified tablet. Other passengers can also watch and enjoy your library videos, at their leisure, on their personal display, or with a DNLA app on their own smartphone or tablet.

TAILWIND® TV

Our Tailwind family of airborne satellite TV systems is capable of receiving high-definition broadcast channels, where available, for the most comprehensive and compelling content available in the air. Watch sports, news and other live content. You won't miss a thing while you're traveling in the contiguous United States or between multiple regions worldwide, such as Europe and the Middle East.

Another option for enjoying smoothly streaming, live TV content is the worldwide connectivity of JX and Inmarsat SwiftBroadband.

BLU-RAY™

Venue delivers your content, from Blu-ray movies to USB-stored media, with crystal-clear picture quality.

FORWARD-FOCUSED DESIGN

New, highly desirable technologies arrive on the consumer scene every year. Fortunately, your Venue system will already be poised to take advantage of many of these technologies. For example, Venue easily accommodates any of our new 4K display offerings – so you can take your in-flight viewing enjoyment to the most advanced level. And, when you prefer to view content on your tablet, our selection of personal tablet arms and holders can position your device for maximum comfort while keeping it fully charged.

CONTENT CONTROL THAT IS SLEEK, SOPHISTICATED, INTUITIVE

Give your passengers individual command over their Venue experience with a choice of control types. Venue’s control elements are software customizable to accommodate different cabin management system configurations and user needs. They include:

Touchscreen switch panel – With optimized design for installation and usage near your seat, our touchscreen switch panel provides comprehensive seat and cabin controls. It incorporates state-of-the-art technology, dynamically supports VIP and standard configurations, and can default to a flight

Touchscreen switch panel

Choose from 24-, 42- and 65-inch high-definition bulkhead displays or cabin-wide 4K displays in sizes from 15 to 75 inches

status display when not in use. Bezels are plateable to match your unique cabin interior.

HD galley and in-seat touchscreens – Provide users with the controls to manage the system’s entertainment and environmental capabilities. Their 10.6-inch HD touchscreens use a refined, intuitive and simple user interface, including easy-to-use maintenance diagnostics and customizable icons and aircraft layout. The AVOD and Airshow interactive map applications are stored on these smart touchscreen monitors, eliminating the need for additional hardware.

Venue is designed to support exciting new consumer technologies as they emerge.

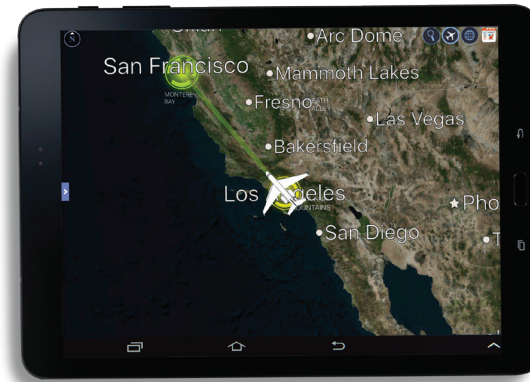

10.6-inch HD personal touchscreen

Personal tablet arm charges and holds your devices

Venue Cabin Remote app – Provides complete cabin control management from your iOS and Android devices. The app dynamically recognizes the configuration of your cabin and enables you to control lighting, shades, temperature and entertainment, including your Airshow moving map.
