

GO BEYOND

PRATT & WHITNEY JOINS THE ASHEVILLE COMMUNITY

We're building a world-class advanced casting foundry and airfoil production facility

BRINGING OPPORTUNITY TO ASHEVILLE

From encouraging STEM education to working with veterans of the U.S. Armed Forces, to partnerships with local businesses to volunteering within the community, Pratt & Whitney will build strong partnerships and make a positive impact on the greater Asheville community.

800
NEW JOBS

From production technicians to machine operators, we are partnering with AB Tech to train our future hourly workforce.

WHAT IS AN AIRFOIL?

Turbine airfoils are an integral piece of the engine. Like a pinwheel, they spin the shaft that drives the fan and pushes the engine forward. They are small airplane wing shaped components that extract propulsive energy from the gas stream within the engine.

THERE ARE
~4,000
AIRFOILS IN
A STANDARD
JET ENGINE

WE RESPECT OUR ENVIRONMENT

1M
