CERTIFIED PRE-OWNED ENGINE PROGRAM FOR HELICOPTERS

Our Certified Pre-Owned (CPO) Engine program is about delivering greater value and peace of mind to P&W-powered used-helicopter operators, buyers and sellers. The program also supports helicopter dealers in differentiating their inventory – helping drive sales and reducing time on market.

How it works: Under this program, PT6C, PT6B, PT6T, PW200 and PW210 engines that pass a thorough certification inspection will be eligible for a two-year/500-hour warranty (whichever comes first).

For helicopter buyers, it means you can have complete confidence in your used helicopter's powerplant – along with the peace of mind provided by genuine P&W parts and maintenance. It also simplifies the buying process by combining a pre-buy inspection with an OEM-backed extended engine warranty.

For dealers, it means greater value for your used P&W-powered helicopters, enabling you to sell your assets more quickly and enhance customer satisfaction.

The CPO Engine Program is another way we are delivering on our commitment to offering programs suited to every stage of the engine lifecycle, bringing greater value and more options to our customers.

HOW ARE ENGINES CERTIFIED?

Used helicopter buyers and sellers submit engines to be certified by P&W experts, including:

- review of maintenance records
- visual inspection
- power assurance run
- borescope inspection
- Oil Analysis Technology assessment

WHAT DOES THE WARRANTY COVER?

The warranty lasts for two years or 500 flying hours (whichever occurs first) from the date of activation. It covers repair or replacement of any engine parts found to be defective, plus any engine damage caused by the defective part.

ADDITIONAL BENEFITS UNDER THE CPO PROGRAM INCLUDE:

- Up to \$15,000 USD credit towards enrollment in Pratt & Whitney's Eagle Service™ Plan (ESPTM)
- Complimentary one-year subscription to the P&W technical publications maintenance collection
- Special discounts with our training partner FlightSafety for maintenance training programs
- Preferential pricing on non-covered events
