# PW206 AND PW207 HELICOPTER ENGINES

## COVERAGE WITH EAGLE SERVICE™ PLAN (ESP™) PLATINUM

- Environmental damage repair at overhaul
- Routine periodic inspections
- Technical publications

## ANCILLARY SERVICES

- Advanced technology oil analysis

## NO ANNUAL MINIMUMS

Only pay for the hours you fly

**GO BEYOND**

# ESP™ PLATINUM FOR PW206 AND PW207 HELICOPTER ENGINES

## ENVIRONMENTAL DAMAGE REPAIR AT OVERHAUL

- Coverage includes the cost of labour and/or parts replacement to repair environmental damage, i.e., corrosion or erosion, at overhaul, as required by the engine manuals, and applies to external components such as cases and housings, as well as internal components such as turbine blades, bearings, etc.
- Coverage is subject to documented compliance with the engine maintenance manual (EMM), including engine washing and preservation.
- Erosion driven events or environmental damage repair other than at overhaul are not covered. Where available, the installation of an inlet barrier filter (IBF) will reduce the likelihood of damage or removal due to erosion.

**Note:** Pratt & Whitney Canada (P&WC) may require review or inspection prior to enrollment or upgrade to Platinum

## ROUTINE PERIODIC INSPECTIONS

- Coverage includes reasonable labour costs to perform the routine periodic inspections and maintenance tasks specified in the “Scheduled Maintenance Checks” table in Chapter 05-20 of the EMM, as well as the cost of the associated engine parts and consumables required during the inspections. Pre-flight / daily inspections, washes, regular oil replenishment, and routine power assurance checks (PACs) are not covered.
- Coverage includes the cost of advanced-exchange fuel nozzles at the fuel nozzle Scheduled Maintenance Check interval, subject to 30 days prior notice of the upcoming requirement.
- Inspections will be covered in accordance with the recommended intervals in the EMM.
- ESP does not limit the operator to a specific service center or facility for coverage of these inspections. P&WC will compensate the maintenance facility for reasonable charges for performing the routine periodic inspections.

## TECHNICAL PUBLICATIONS

- Coverage includes the costs for an on-going subscription for on-line access via P&WC’s customer portal to the Maintenance Collection of P&WC technical publications (consisting of the Engine Maintenance Manual, diagnostic tool, Illustrated Parts Catalog, and service bulletins updates) for up to ten user licences.

## ANCILLARY SERVICES

### ADVANCED TECHNOLOGY OIL ANALYSIS

- Coverage includes the cost of P&WC’s advanced technology oil analysis service at least once a year, or more frequently based on the sampling intervals recommended in the P&WC manuals.
- This service includes oil sample kits, laboratory services, and detailed reports and customized maintenance recommendations as applicable based on the results of the detailed report.
