GO BEYOND

ESPECIALLY FOR YOUR PT6A

WELCOME TO ESP™ FOR YOUR PT6A ENGINE

THE FIRST 400 HOURS OF COVERAGE ARE ON US

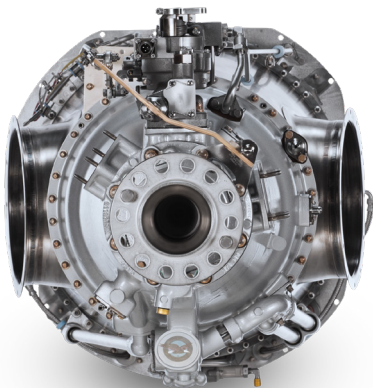

Delivering you the best long-term value and peace of mind is our top priority. That's why, when you enroll a new PT6A engine¹ in our Eagle Service™ Plan (ESP), we'll give you the first 400 hours² at no charge – a value of up to \$70,000 USD per engine towards covered maintenance and services.

After the initial no-charge trial period, you will continue to benefit from a discounted ESP hourly rate until first overhaul depending on the engine model.

It's our way of thanking you for becoming a new PT6A operator.

WHAT IS ESP?

ESP is a pay-per-hour maintenance cost guarantee program that covers major scheduled engine maintenance events as well as basic unscheduled engine and accessory maintenance, required service bulletin upgrades, and a number of related support services. Since ESP coverage is transferable at aircraft sale to subsequent owners or operators, it becomes a portable asset to enhance your aircraft resale value and improves the potential for buyer consideration.

¹ Some conditions and exceptions apply. Contact your ESP representative for details.

² Up to 400 hours Total Time Since New or two years from date of aircraft delivery, whichever occurs first, for engines enrolled when new.

WHAT ARE THE NEXT STEPS?

1. Sign up

Simply complete an ESP Program request form and return it to us at **ESPeciallyPT6@pwc.ca**.

We will then send you an ESP agreement for your signature¹.

2. Get acquainted with your ESP representative

You will be assigned an ESP representative who will help you get started, provide information about ESP and answer any questions you may have.

3. Report your flying hours

Under ESP, flying hours are reported on a monthly basis. As the operator of a new P&WC engine, you will have access to our customer portal where you can easily report your flying hours and benefit from other online services.

ESPECIALLY QUALIFIED

Engines enrolled on ESP are maintained by the people who designed them, manufactured them and know them best. With them comes the promise of the most comprehensive service network in the industry. We have the facilities, the parts, the rental engines and the experts to ensure that you and your engine(s) are provided with the service levels expected from the manufacturer.
