operational disruptions.

A UNITED TECHNOLOGIES COMPANY

GO BEYOND

PRATT & WHITNEY ADVISORY SERVICES

AT A GLANCE

Our Advisory Services offer a portfolio of tailored service solutions, delivered by engine OEM experts, to propel your engine operations and maintenance to their highest standard at the lowest cost to your organization.

Our experts will focus on your engine maintenance and operational processes to enhance efficiency, reduce costs and increase aircraft availability.

Through on-site assessments and actionable recommendations, including optional customized solutions, our advisors will help maximize uptime and minimize unscheduled maintenance for your aircraft operations.

WHAT TO EXPECT

- Proven engine OEM expertise and knowledge.
- Solutions specifically designed for your operating environment and mission profile.
- The opportunity to optimize your asset and human capital investments.
- Tools to provide engine diagnostics and health management to avoid unplanned events which can disrupt operations.
- A fully collaborative approach with all levels within your organization, from finance to maintenance staff and beyond.

ADVISORY SERVICES DELIVERABLES

We use a proven diagnostic-consulting model to understand your key cost drivers and identify opportunities to improve maintenance processes, increase availability and reduce costs. Following our data collection and analysis, we deliver detailed recommendations along with a customized action plan.

Step 1 - Maintenance & Operational Review

Our experts will perform a structured on-site engine maintenance and operational assessment focusing on the following areas:

- Engine line maintenance
- Planning and scheduling
- Assets and logistics
- Flight operations

Step 2 - Recommendations & Actions

We will provide you with a detailed evaluation, including an action plan to optimize your maintenance processes and reduce costs.

Step 3 - Customized Solutions

Depending on your needs and budget, we will work with you on a set of tailored solutions and services designed to your environment. These may include:

- Engine line replaceable unit (LRU) availability services
- Consumable parts solutions
- Spare engine solutions
- P&WCSMART maintenance solutions
- Digital Engine Services including FAST™ and Oil Analysis Technology
