Re: Toxic Substance Control Act – New Persistent, Bioaccumulative and Toxic Rules

Dear Valued Supplier,

This alert is being provided to you for informational purposes only. We do not require a response from you at this time.

In early 2021, the U.S. Environmental Protection Agency (“EPA”) final rules under Section 6(h) of the Toxic Substances Control Act (TSCA) for five (5) chemical substances recognized as Persistent, Bioaccumulative, and Toxic (PBT) took effect. Further information about the EPA PBT rules can be obtained through this link: <https://www.epa.gov/assessing-and-managing-chemicals-under-tsca/persistent-bioaccumulative-and-toxic-pbt-chemicals-under>

The five substances are:

- Decabromodiphenyl ether (decaBDE) (CAS 1163-19-5)
- 2,4,6-Tris(tert-butyl) phenol (2,4,6-TTBP) (CAS 732-26-3)
- Hexachlorobutadiene (HCBd) (CAS 87-68-3)
- Pentachlorothiophenol (PCTP) (CAS 133-49-3)
- Phenol, isopropylated phosphate (3:1) (PIP (3:1)) (CAS 68937-41-7)

The restrictions in the U.S, EPA PBT rules could apply to your business if you are importing into the U.S, and/or have operations in the U.S. Please ensure that you have taken the time to review the requirements of these rules for each substance and understand the impact to your operations and any regulatory obligations you may have as a supplier to us. Be aware there are some exemptions/exceptions for uses that allow for continued use of these substances for specific applications.

As with other regulatory and legal requirements, Raytheon Company expects your company's compliance with the EPA PBT rules.

Thank you for your prompt attention to this matter.

Regards,

Raytheon Company Business Supply Chain
