

Vincent M. Campisi

Executive Vice President,
Enterprise Services & Chief Digital Officer

Vincent M. Campisi is the chief digital officer and leader of the Enterprise Services division at RTX. He directs the company's digital strategy and global business services to minimize risk, enhance efficiency, and drive business growth.

Campisi has 25 years of experience in the aerospace and defense, energy, financial services, and technology sectors. Prior to United Technologies' merger with Raytheon Company, he served as senior vice president and chief digital officer for UTC. Campisi focused on strengthening cybersecurity, maximizing productivity through information technology, and implementing enhanced software and data analytics practices. Before joining UTC in 2016, Campisi held multiple leadership roles at General Electric.

Campisi enjoys working with RTX STEM-related initiatives, including serving on the board of directors for Girls Who Code. He earned a bachelor's degree in information systems and marketing from the State University of New York at Albany.
