

Venue™ smart monitor featuring Airshow® HD

Future-ready, standalone smart monitor for in-flight entertainment

Collins Aerospace
An RTX Business

A refreshing cabin upgrade for business aircraft of all sizes

Venue smart monitors

Collins Aerospace Venue™ smart monitors (VSMs) are more than just an upgrade—they're cutting-edge, future-ready cabin technology. The Venue family of 4K (60 frames per second) UHD monitors serve as the backbone of the passenger experience, delivering the most advanced displays with built-in computing power and agility to efficiently combine value and visual appeal. This streamlined cabin entertainment upgrade also provides an Airshow™ experience that is truly a game-changer.

AVAILABLE IN MULTIPLE CLASS SIZES	Resolution	Touchscreen	Four-terabyte SSD drive	HDMI port
10" full HD	1920p x 1200p	Y	Optional	Y

24" 4K UHD	3840p x 2160p	N	Optional	Y

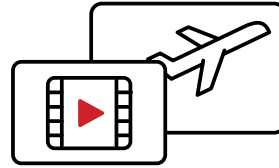

With high-speed internet becoming more affordable and accessible on business aircraft of all sizes, expectations for in-flight connectivity are rising. Business jet operators must ensure that their cabin entertainment systems are updated to deliver a seamless, high-quality passenger experience, matching the streaming capabilities and convenience people are used to at home and at the office. Is your business jet equipped for the future?

Elevate your in-flight entertainment with the standalone VSM featuring Airshow HD. With versatile installation options for any aircraft size, this innovative Venue product line enhancement delivers the latest in pristine map views and entertainment on-demand to impress principals and passengers alike.
