## Raytheon Technologies in the U.S. (2020)

● Commercial ● Defense

### Raytheon Technologies consists of four highly specialized businesses

#### Collins Aerospace

Specializes in aerostructures, avionics, interiors, mechanical systems, mission systems, and power and control systems that serve customers across the commercial, regional, business aviation and military sectors.

#### Pratt & Whitney

Designs, manufactures and services the world's most advanced aircraft engines and auxiliary power systems for commercial, military and business aircraft.

#### Raytheon Intelligence & Space

Specializes in developing advanced sensors, training, and cyber and software solutions — delivering the disruptive technologies its customers need to succeed in any domain, against any challenge.

#### Raytheon Missiles & Defense

Provides the industry's most advanced end-to-end solutions to detect, track and engage threats.

# Corporate Social Responsibility

At Raytheon Technologies, taking on the world's biggest challenges extends beyond our business operations. Through transformative investments in talent and resources, we enable lifelong learning, honor those who serve and positively impact local communities globally.

We are helping to shape Texas' next generation of purpose-driven innovators by supporting STEM education programs that cultivate skills, diverse thinking and leadership abilities.

- For more than four decades we have celebrated tens of thousands student inventors in the National Invention Convention by combining employee judges and sponsorship funding.
- With a signature investment in Girls Who Code clubs and programs we are helping to close the gender diversity gap in computer science.
- Countless FIRST robotics K-12 students have received employee mentor and team grant support from our company over the past 25 years.

- We have grown our first investment in an engineering-themed academy at Hartford Public High School into a national partnership with the National Academy Foundation (NAF) to expand Academies of Engineering to new geographic locations across the U.S.

In addition, Raytheon Technologies makes strategic investments in critical community organizations that support basic human needs, promote diversity and inclusion and make the places where we live and work more vibrant and sustainable.

## Commitment to sustainable solutions

Raytheon Technologies has long recognized the value of sustainable practices. Since 1992, we have implemented sustainability initiatives across our businesses designed to reduce the impact of our activities on the environment and strengthen the economic health of future generations.

### Investing in our employees

Raytheon Technologies Employee Scholar Program

The Employee Scholar Program is a comprehensive company-sponsored employee education program, encouraging employees to develop new skills and engage in lifelong learning.

	Spend	Current Enrollment	Degrees
Worldwide	\$1.5B	8,639	43,000
<b>Texas</b>	<b>\$30M</b>	<b>103</b>	<b>895</b>
