

Kenneth Wilcox

Vice President and Chief Information Officer

Kenneth Wilcox is vice president of Digital Technology and chief information officer for Raytheon, a business of RTX that specializes in integrated air and missile defense, advanced sensors, space-based systems, hypersonics, effectors and cyber solutions. He is responsible for strategy and planning, cybersecurity, driving business efficiency and the execution of priority digital initiatives to enhance customer value.

Wilcox brings a broad set of experiences to the aerospace and defense business. Following the merger of Raytheon Company and United Technologies Corporation, he led integration efforts to simplify IT infrastructure, consolidate systems and maximize cost synergies across the newly formed company.

Prior to his current role, Wilcox served as the CIO for Raytheon Missiles & Defense. Over the course of his career, he has held various digital leadership positions with Pratt & Whitney, Collins Aerospace and United Technologies, where he was responsible for large-scale enterprise and business transformation programs across engineering, manufacturing and aftermarket services.

Wilcox holds a master's degree in computer science from Rensselaer Polytechnic Institute and a bachelor's degree in computer science from Central Connecticut State University.
